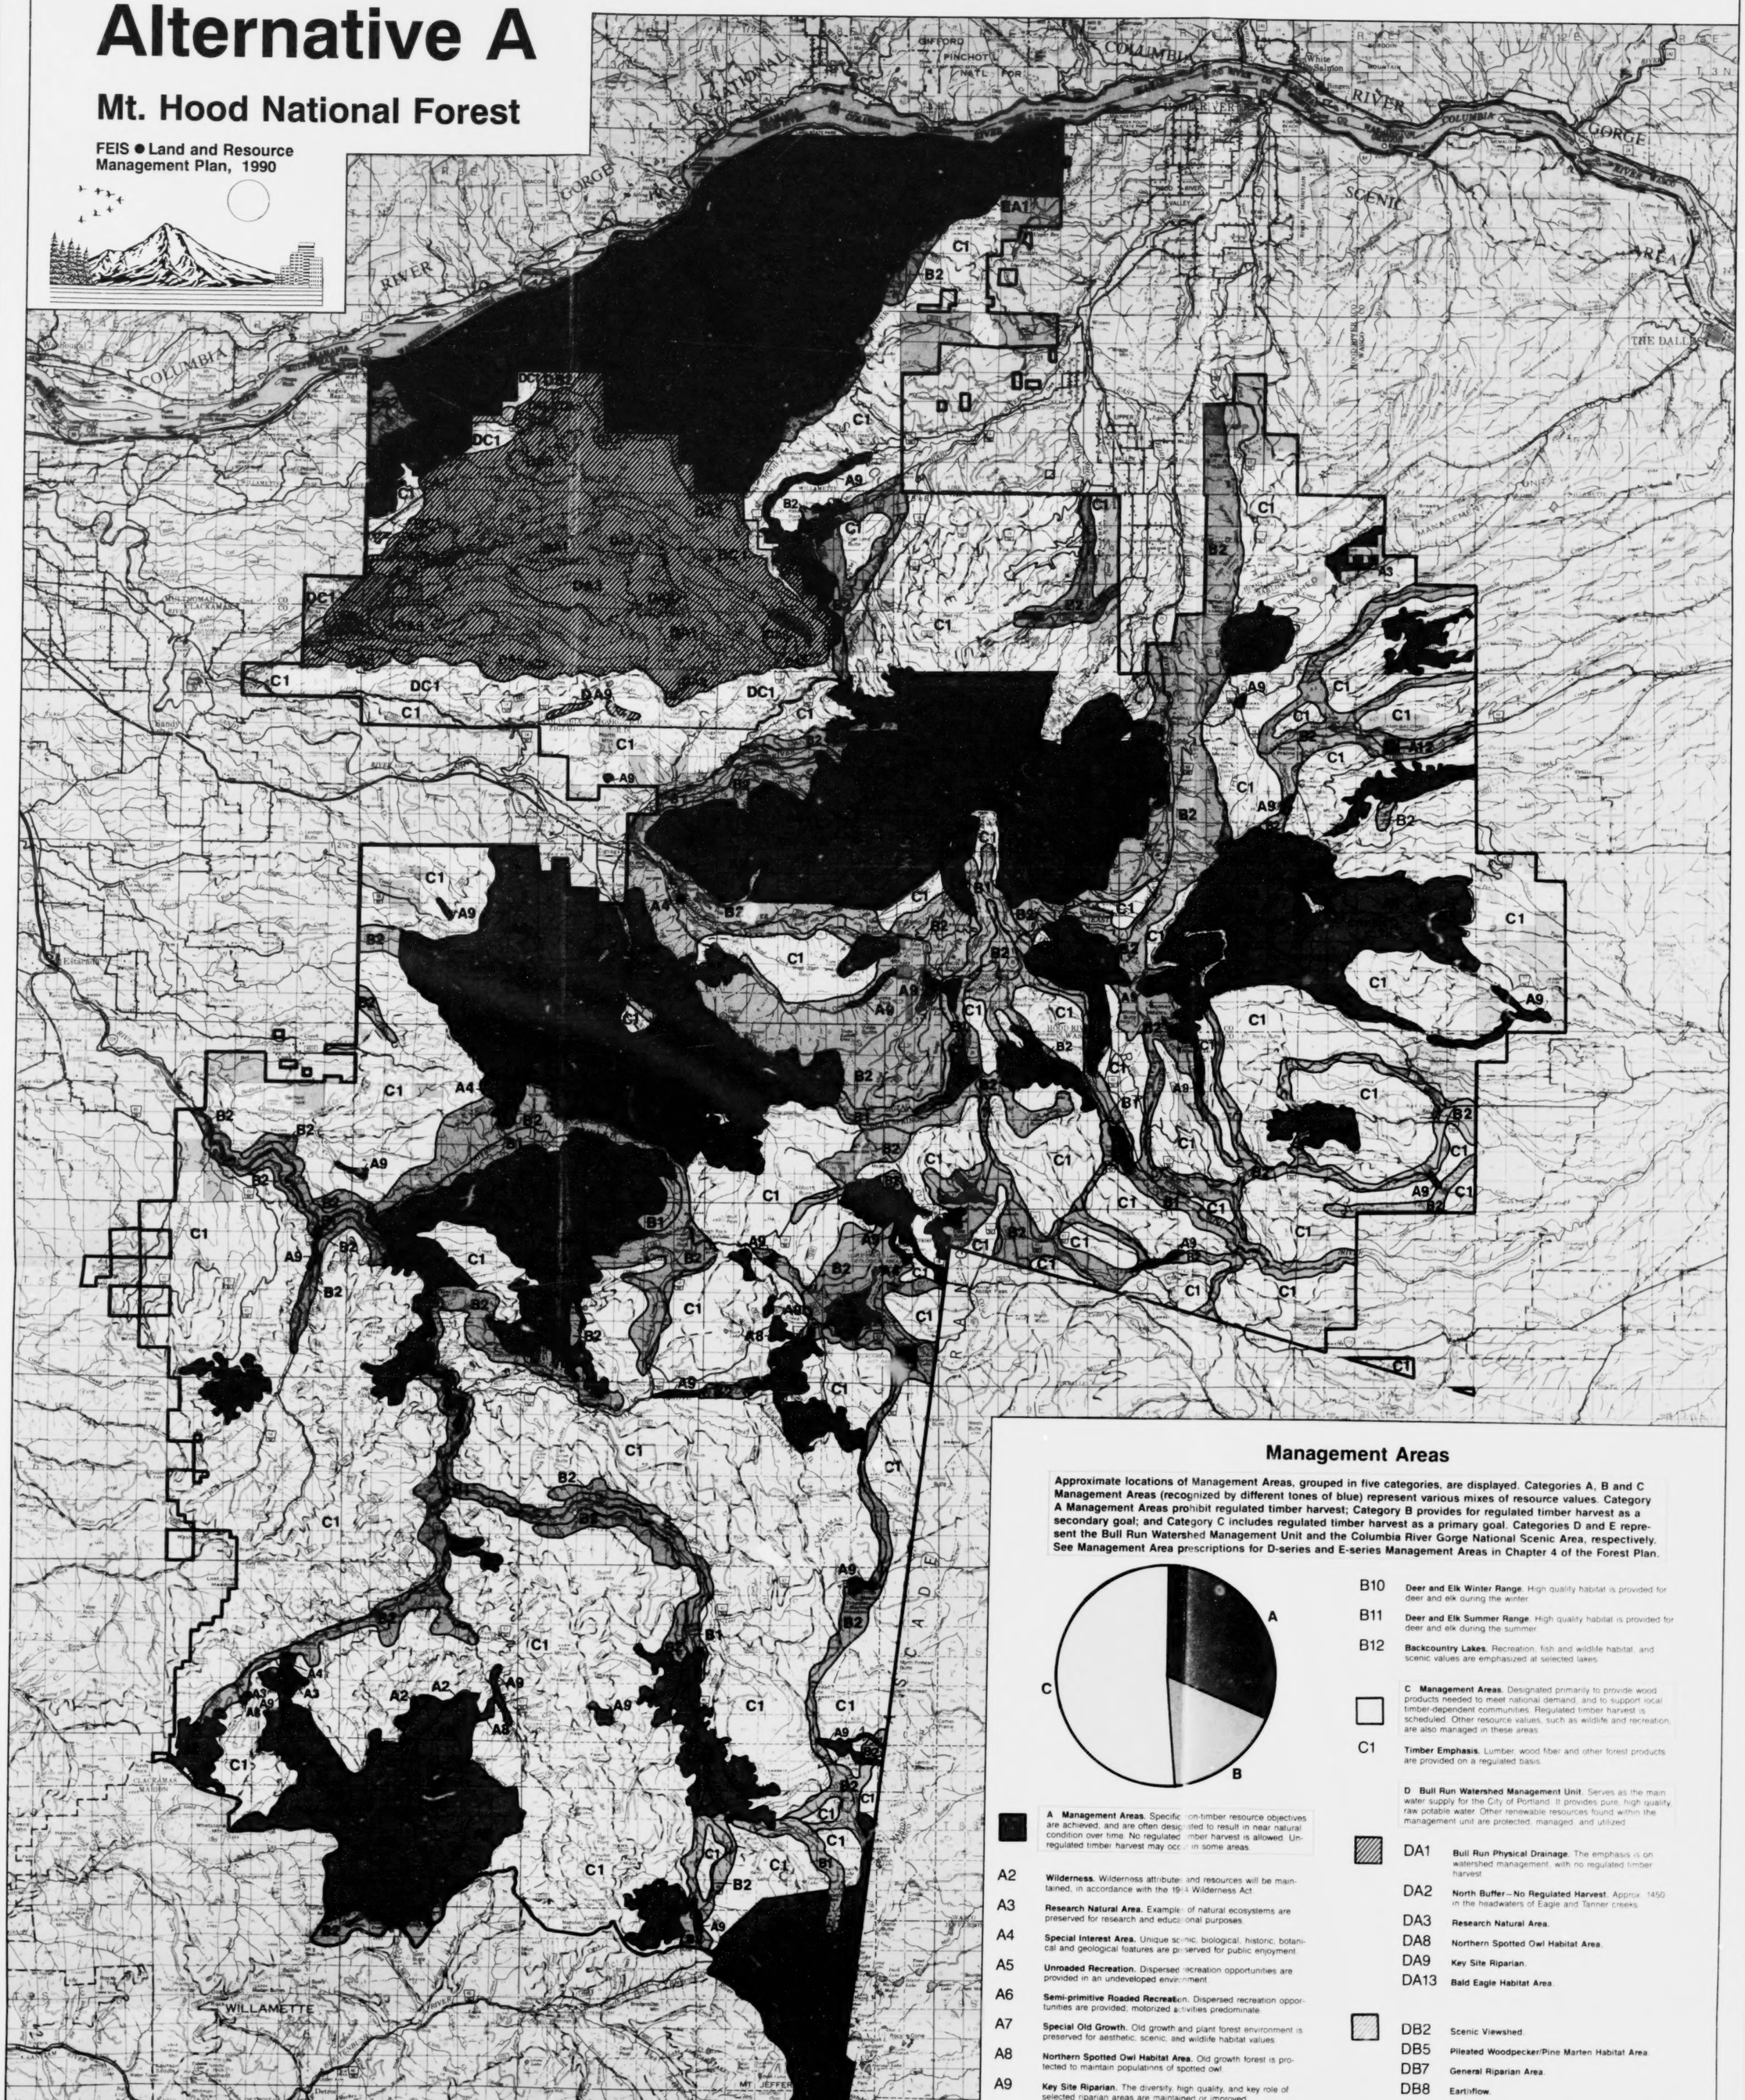
FEIS • Land and Resource Management Plan, 1990



Management Areas

Approximate locations of Management Areas, grouped in five categories, are displayed. Categories A, B and C Management Areas (recognized by different tones of blue) represent various mixes of resource values. Category A Management Areas prohibit regulated timber harvest; Category B provides for regulated timber harvest as a secondary goal; and Category C includes regulated timber harvest as a primary goal. Categories D and E represent the Bull Run Watershed Management Unit and the Columbia River Gorge National Scenic Area, respectively. See Management Area prescriptions for D-series and E-series Management Areas in Chapter 4 of the Forest Plan.

A Management Areas. Specific non-timber resource objectives are achieved, and are often designated to result in near natural condition over time. No regulated timber harvest is allowed. Unregulated timber harvest may occur in some areas.

- **A2** **Wilderness.** Wilderness attributes and resources will be maintained, in accordance with the 1964 Wilderness Act.
- **A3** **Research Natural Area.** Examples of natural ecosystems are preserved for research and educational purposes.
- **A4** **Special Interest Area.** Unique scenic, biological, historic, botanical and geological features are preserved for public enjoyment.
- **A5** **Unroaded Recreation.** Dispersed recreation opportunities are provided in an undeveloped environment.
- **A6** **Semi-primitive Roaded Recreation.** Dispersed recreation opportunities are provided; motorized activities predominate.
- **A7** **Special Old Growth.** Old growth and plant forest environment is preserved for aesthetic, scenic, and wildlife habitat values.
- **A8** **Northern Spotted Owl Habitat Area.** Old growth forest is protected to maintain populations of spotted owl.
- **A9** **Key Site Riparian.** The diversity, high quality, and key role of selected riparian areas are maintained or improved.
- **A10** **Developed Recreation.** A range of recreation opportunities are provided, e.g., summer homes, campgrounds and trailheads.
- **A11** **Winter Recreation Area.** Developed winter recreation opportunities are provided in high elevations near Mt. Hood.
- **A12** **Outdoor Education Area.** Opportunities for outdoor education and environmental interpretation are provided.
- **A13** **Bald Eagle Habitat Area.** Potential bald eagle nesting and winter/communal roost areas are identified.

B Management Areas. Specific non-timber resource objectives are achieved, and regulated timber harvest is allowed. Multiple resource values restrict the size of created openings, rotation lengths, and rates of timber harvest.

- **B1** **Designated Wild, Scenic, and Recreational River.** These rivers are part of the National Wild and Scenic River System.
- **B2** **Scenic Viewshed.** The appearance of landscapes seen from popular travel routes and locations are prescribed.
- **B3** **Roaded Recreation.** A range of dispersed, predominantly motorized recreation uses are provided.
- **B4** **Pine-Oak Habitat Area.** Sufficient pine/oak habitat is provided to meet the needs of resident wildlife populations.
- **B5** **Pileated Woodpecker/Pine Marten Habitat Area.** Mature/old growth habitat is managed for associated wildlife species.
- **B6** **Special Emphasis Watershed.** Management emphasis is placed on watershed stability and water related values.
- **B7** **General Riparian Area.** General habitat diversity of terrestrial and aquatic habitat is maintained (not mapped).
- **B8** **Earthflow.** Area is maintained to reduced the risk of reactivating or accelerating large, slow moving landslides.
- **B9** **Wildlife/Visual Area.** Habitat is provided for deer and elk while maintaining a natural landscape character.
- **B10** **Deer and Elk Winter Range.** High quality habitat is provided for deer and elk during the winter.
- **B11** **Deer and Elk Summer Range.** High quality habitat is provided for deer and elk during the summer.
- **B12** **Backcountry Lakes.** Recreation, fish and wildlife habitat, and scenic values are emphasized at selected lakes.

C Management Areas. Designated primarily to provide wood products needed to meet national demand, and to support local timber-dependent communities. Regulated timber harvest is scheduled. Other resource values, such as wildlife and recreation, are also managed in these areas.

- **C1** **Timber Emphasis.** Lumber, wood fiber and other forest products are provided on a regulated basis.

D Bull Run Watershed Management Unit. Serves as the main water supply for the City of Portland. It provides pure, high quality, raw potable water. Other renewable resources found within the management unit are protected, managed, and utilized.

- **DA1** **Bull Run Physical Drainage.** The emphasis is on watershed management, with no regulated timber harvest.
- **DA2** **North Buffer—No Regulated Harvest.** Approx. 1450 in the headwaters of Eagle and Tanner creeks.
- **DA3** **Research Natural Area.**
- **DA8** **Northern Spotted Owl Habitat Area.**
- **DA9** **Key Site Riparian.**
- **DA13** **Bald Eagle Habitat Area.**
- **DB2** **Scenic Viewshed.**
- **DB5** **Pileated Woodpecker/Pine Marten Habitat Area.**
- **DB7** **General Riparian Area.**
- **DB8** **Earthflow.**
- **DC1** **Buffer, Timber Emphasis.**

E Columbia River Gorge National Scenic Area. The scenic, cultural, recreational and natural resources of the Columbia River Gorge National Scenic Area are emphasized.

- **EA1** **Scenic Area**
- **EA4** **Special Interest Area.**
- **EA8** **Northern Spotted Owl Habitat Area.**
- **EA9** **Key Site Riparian**
- **EA10** **Developed Recreation.**
- **EA12** **Outdoor Education Area.**
- **EA13** **Bald Eagle Habitat Area.**
- **EB2** **Scenic Viewshed.**
- **EB5** **Pileated Woodpecker/Pine Marten Habitat Area.**
- **EB7** **General Riparian Area.**

- A7 **Special Old Growth.** Old growth and plant forest environment is preserved for aesthetic, scenic, and wildlife habitat values.
- A8 **Northern Spotted Owl Habitat Area.** Old growth forest is protected to maintain populations of spotted owl.
- A9 **Key Site Riparian.** The diversity, high quality, and key role of selected riparian areas are maintained or improved.
- A10 **Developed Recreation.** A range of recreation opportunities are provided, e.g., summer homes, campgrounds and trailheads.
- A11 **Winter Recreation Area.** Developed winter recreation opportunities are provided in high elevations near Mt. Hood.
- A12 **Outdoor Education Area.** Opportunities for outdoor education and environmental interpretation are provided.
- A13 **Bald Eagle Habitat Area.** Potential bald eagle nesting and winter/communal roost areas are identified.

B Management Areas. Specific non-timber resource objectives are achieved, and regulated timber harvest is allowed. Multiple resource values restrict the size of created openings, rotation lengths, and rates of timber harvest.

- B1 **Designated Wild, Scenic, and Recreational River.** These rivers are part of the National Wild and Scenic River System.
- B2 **Scenic Viewshed.** The appearance of landscapes seen from popular travel routes and locations are prescribed.
- B3 **Roaded Recreation.** A range of dispersed, predominantly motorized recreation uses are provided.
- B4 **Pine–Oak Habitat Area.** Sufficient pine/oak habitat is provided to meet the needs of resident wildlife populations.
- B5 **Pileated Woodpecker/Pine Marten Habitat Area.** Mature/old growth habitat is managed for associated wildlife species.
- B6 **Special Emphasis Watershed.** Management emphasis is placed on watershed stability and water related values.
- B7 **General Riparian Area.** General habitat diversity of terrestrial and aquatic habitat is maintained (not mapped).
- B8 **Earthflow.** Area is maintained to reduced the risk of reactivating or accelerating large, slow moving landslides.
- B9 **Wildlife/Visual Area.** Habitat is provided for deer and elk while maintaining a natural landscape character.
- B10 **Deer and Elk Winter Range.** High quality habitat is provided for deer and elk during the winter.
- B11 **Deer and Elk Summer Range.** High quality habitat is provided for deer and elk during the summer.
- B12 **Backcountry Lakes.** Recreation, fish and wildlife habitat, and scenic values are emphasized at selected lakes.

C Management Areas. Designated primarily to provide wood products needed to meet national demand, and to support local timber-dependent communities. Regulated timber harvest is scheduled. Other resource values, such as wildlife and recreation are also managed in these areas.

- C1 **Timber Emphasis.** Lumber, wood fiber and other forest products are provided on a regulated basis.

D Bull Run Watershed Management Unit. Serves as the main water supply for the City of Portland. It provides pure, high quality raw potable water. Other renewable resources found within the management unit are protected, managed, and utilized.

- DA1 **Bull Run Physical Drainage.** The emphasis is on watershed management, with no regulated timber harvest.
- DA2 North Buffer – No Regulated Harvest. Approx. 1450 in the headwaters of Eagle and Tanner creeks.
- DA3 Research Natural Area.
- DA8 Northern Spotted Owl Habitat Area.
- DA9 Key Site Riparian.
- DA13 Bald Eagle Habitat Area.
- DB2 Scenic Viewshed.
- DB5 Pileated Woodpecker/Pine Marten Habitat Area.
- DB7 General Riparian Area.
- DB8 Earthflow.
- DC1 Buffer, Timber Emphasis.

E Columbia River Gorge National Scenic Area. The scenic, cultural, recreational and natural resources of the Columbia River Gorge National Scenic Area are emphasized.

- EA1 Scenic Area.
- EA4 Special Interest Area.
- EA8 Northern Spotted Owl Habitat Area.
- EA9 Key Site Riparian.
- EA10 Developed Recreation.
- EA12 Outdoor Education Area.
- EA13 Bald Eagle Habitat Area.
- EB2 Scenic Viewshed.
- EB5 Pileated Woodpecker/Pine Marten Habitat Area.
- EB7 General Riparian Area.

The following Management Areas are not shown on this map because of space limitations: A13, B5, B7, DA13, DB5, DB7, EA10, EA13, EB5, EB7, some A10, Eligible Wild and Scenic Rivers with viewsheds, and special places. Management Areas

Approximate locations of Management Areas, grouped in five categories, are displayed. Categories A, B and C Management Areas (recognized by different tones of blue) represent various mixes of resource values. Category A Management Areas prohibit regulated timber harvest; Category B provides for regulated timber harvest as a secondary goal; and Category C includes regulated timber harvest as a primary goal. Categories D and E represent the Bull Run Watershed Management Unit and the Columbia River Gorge National Scenic Area, respectively. See Management Area prescriptions for D-series and E-series Management Areas in Chapter 4 of the Forest Plan.

B10 Deer and Elk Winter Range. High quality habitat is provided for deer and elk during the winter.

B11 Deer and Elk Summer Range. High quality habitat is provided for deer and elk during the summer.

B12 Backcountry Lakes. Recreation, fish and wildlife habitat, and scenic values are emphasized at selected lakes.

C Management Areas. Designated primarily to provide wood products needed to meet national demand, and to support local timber-dependent communities. Regulated timber harvest is scheduled. Other resource values, such as wildlife and recreation, are also managed in these areas.

C1 Timber Emphasis. Lumber, wood fiber and other forest products are provided on a regulated basis.

D Bull Run Watershed Management Unit. Serves as the main water supply for the City of Portland. It provides pure, high quality, raw potable water. Other renewable resources found within the management unit are protected, managed, and utilized.

DA1 Bull Run Physical Drainage. The emphasis is on watershed management, with no regulated timber harvest.

DA2 North Buffer – No Regulated Harvest. Approx. 1400 in the headwaters of Eagle and Tanner creeks.

DA3 Research Natural Area.

DA8 Northern Spotted Owl Habitat Area.

DA9 Key Site Riparian.

DA13 Bald Eagle Habitat Area.

DB2 Scenic Viewshed.

DB5 Pileated Woodpecker/Pine Marten Habitat Area.

DB7 General Riparian Area.

DB8 Earthflow.

DC1 Buffer, Timber Emphasis.

E Columbia River Gorge National Scenic Area. The scenic, cultural, recreational and natural resources of the Columbia River Gorge National Scenic Area are emphasized.

EA1 Scenic Area.

EA4 Special Interest Area.

EA8 Northern Spotted Owl Habitat Area.

EA9 Key Site Riparian.

EA10 Developed Recreation.

EA12 Outdoor Education Area.

EA13 Bald Eagle Habitat Area.

EB2 Scenic Viewshed.

EB5 Pileated Woodpecker/Pine Marten Habitat Area.

EB7 General Riparian Area.

A Management Areas. Specific non-timber resource objectives are achieved, and are often designated to result in near natural condition over time. No regulated timber harvest is allowed. Unregulated timber harvest may occur in some areas.

A2 Wilderness. Wilderness attributes and resources will be maintained, in accordance with the 1964 Wilderness Act.

A3 Research Natural Area. Examples of natural ecosystems are preserved for research and educational purposes.

A4 Special Interest Area. Unique scenic, biological, historic, botanical and geological features are preserved for public enjoyment.

A5 Unroaded Recreation. Dispersed recreation opportunities are provided in an undeveloped environment.

A6 Semi-primitive Roaded Recreation. Dispersed recreation opportunities are provided; motorized activities predominate.

A7 Special Old Growth. Old growth and plant forest environment is preserved for aesthetic, scenic, and wildlife habitat values.

A8 Northern Spotted Owl Habitat Area. Old growth forest is protected to maintain populations of spotted owl.

A9 Key Site Riparian. The diversity, high quality, and key role of selected riparian areas are maintained or improved.

A10 Developed Recreation. A range of recreation opportunities are provided, e.g., summer homes, campgrounds and trailheads.

A11 Winter Recreation Area. Developed winter recreation opportunities are provided in high elevations near Mt. Hood.

A12 Outdoor Education Area. Opportunities for outdoor education and environmental interpretation are provided.

A13 Bald Eagle Habitat Area. Potential bald eagle nesting and winter/communal roost areas are identified.

B Management Areas. Specific non-timber resource objectives are achieved, and regulated timber harvest is allowed. Multiple resource values restrict the size of created openings, rotation lengths, and rates of timber harvest.

B1 Designated Wild, Scenic, and Recreational River. These rivers are part of the National Wild and Scenic River System.

B2 Scenic Viewshed. The appearance of landscapes seen from popular travel routes and locations are prescribed.

B3 Roaded Recreation. A range of dispersed, predominantly motorized recreation uses are provided.

B4 Pine–Oak Habitat Area. Sufficient pine/oak habitat is provided to meet the needs of resident wildlife populations.

B5 Pileated Woodpecker/Pine Marten Habitat Area. Mature/old growth habitat is managed for associated wildlife species.

B6 Special Emphasis Watershed. Management emphasis is placed on watershed stability and water related values.

B7 General Riparian Area. General habitat diversity of terrestrial and aquatic habitat is maintained (not mapped).

B8 Earthflow. Area is maintained to reduced the risk of reactivating or accelerating large, slow moving landslides.

B9 Wildlife/Visual Area. Habitat is provided for deer and elk while maintaining a natural landscape character.

The following Management Areas are not shown on this map because of space limitations: A13, B5, B7, DA13, DB5, DB7, EA10, EA13, EB5, EB7, some A10. Eligible Wild and Scenic Rivers with viewsheds, and special places. These areas are distributed throughout the Forest. A13 and B5 are shown on the Wildlife Resources Map. Complete corridors for Designated Wild and Scenic Rivers are shown on the Designated Viewshed Map. Areas with a ■ are too small to be accurately mapped at this scale. All Management Areas indicated by dashed lines within Wilderness Areas are subject to all Wilderness Standards and Guidelines.

Management Areas

Approximate locations of Management Areas, grouped in five categories, are displayed. Categories A, B and C Management Areas (recognized by different tones of blue) represent various mixes of resource values. Category A Management Areas prohibit regulated timber harvest; Category B provides for regulated timber harvest as a secondary goal; and Category C includes regulated timber harvest as a primary goal. Categories D and E represent the Bull Run Watershed Management Unit and the Columbia River Gorge National Scenic Area, respectively. See Management Area prescriptions for D-series and E-series Management Areas in Chapter 4 of the Forest Plan.

A Management Areas. Specific non-timber resource objectives are achieved, and are often designated to result in near natural condition over time. No regulated timber harvest is allowed. Unregulated timber harvest may occur in some areas.

- A2 **Wilderness.** Wilderness attributes and resources will be maintained, in accordance with the 1964 Wilderness Act.
- A3 **Research Natural Area.** Examples of natural ecosystems are preserved for research and educational purposes.
- A4 **Special Interest Area.** Unique scenic, biological, historic, botanical and geological features are preserved for public enjoyment.
- A5 **Unroaded Recreation.** Dispersed recreation opportunities are provided in an undeveloped environment.
- A6 **Semi-primitive Roaded Recreation.** Dispersed recreation opportunities are provided; motorized activities predominate.
- A7 **Special Old Growth.** Old growth and plant forest environment is preserved for aesthetic, scenic, and wildlife habitat values.
- A8 **Northern Spotted Owl Habitat Area.** Old growth forest is protected to maintain populations of spotted owl.
- A9 **Key Site Riparian.** The diversity, high quality, and key role of selected riparian areas are maintained or improved.
- A10 **Developed Recreation.** A range of recreation opportunities are provided, e.g., summer homes, campgrounds and trailheads.
- A11 **Winter Recreation Area.** Developed winter recreation opportunities are provided in high elevations near Mt. Hood.
- A12 **Outdoor Education Area.** Opportunities for outdoor education and environmental interpretation are provided.
- A13 **Bald Eagle Habitat Area.** Potential bald eagle nesting and winter/communal roost areas are identified.

B Management Areas. Specific non-timber resource objectives are achieved, and regulated timber harvest is allowed. Multiple resource values restrict the size of created openings, rotation lengths, and rates of timber harvest.

- B1 **Designated Wild, Scenic, and Recreational River.** These rivers are part of the National Wild and Scenic River System.
- B2 **Scenic Viewshed.** The appearance of landscapes seen from popular travel routes and locations are prescribed.
- B3 **Roaded Recreation.** A range of dispersed, predominantly motorized recreation uses are provided.
- B4 **Pine-Oak Habitat Area.** Sufficient pine/oak habitat is provided to meet the needs of resident wildlife populations.
- B5 **Pileated Woodpecker/Pine Marten Habitat Area.** Mature/old growth habitat is managed for associated wildlife species.
- B6 **Special Emphasis Watershed.** Management emphasis is placed on watershed stability and water related values.
- B7 **General Riparian Area.** General habitat diversity of terrestrial and aquatic habitat is maintained (not mapped).
- B8 **Earthflow.** Area is maintained to reduced the risk of reactivating or accelerating large, slow moving landslides.
- B9 **Wildlife/Visual Area.** Habitat is provided for deer and elk while maintaining a natural landscape character.
- B10 **Deer and Elk Winter Range.** High quality habitat is provided for deer and elk during the winter.
- B11 **Deer and Elk Summer Range.** High quality habitat is provided for deer and elk during the summer.
- B12 **Backcountry Lakes.** Recreation, fish and wildlife habitat, and scenic values are emphasized at selected lakes.

C Management Areas. Designated primarily to provide wood products needed to meet national demand, and to support local timber-dependent communities. Regulated timber harvest is scheduled. Other resource values, such as wildlife and recreation, are also managed in these areas.

- C1 **Timber Emphasis.** Lumber, wood fiber and other forest products are provided on a regulated basis.

D Bull Run Watershed Management Unit. Serves as the main water supply for the City of Portland; it provides pure, high quality raw potable water. Other renewable resources found within the management unit are protected, managed, and utilized.

- DA1 **Bull Run Physical Drainage.** The emphasis is on watershed management, with no regulated timber harvest.
- DA2 **North Buffer – No Regulated Harvest.** Approx. 1450 in the headwaters of Eagle and Tanner creeks.
- DA3 **Research Natural Area.**
- DA8 **Northern Spotted Owl Habitat Area.**
- DA9 **Key Site Riparian.**
- DA13 **Bald Eagle Habitat Area.**
- DB2 **Scenic Viewshed.**
- DB5 **Pileated Woodpecker/Pine Marten Habitat Area.**
- DB7 **General Riparian Area.**
- DB8 **Earthflow.**
- DC1 **Buffer, Timber Emphasis.**

E Columbia River Gorge National Scenic Area. The scenic, cultural, recreational and natural resources of the Columbia River Gorge National Scenic Area are emphasized.

- EA1 **Scenic Area.**
- EA4 **Special Interest Area.**
- EA8 **Northern Spotted Owl Habitat Area.**
- EA9 **Key Site Riparian.**
- EA10 **Developed Recreation.**
- EA12 **Outdoor Education Area.**
- EA13 **Bald Eagle Habitat Area.**
- EB2 **Scenic Viewshed.**
- EB5 **Pileated Woodpecker/Pine Marten Habitat Area.**
- EB7 **General Riparian Area.**

The following Management Areas are not shown on this map because of space limitations: A13, B5, B7, DA13, DB5, DB7, EA10, EA13, EB5, EB7, some A10, Eligible Wild and Scenic Rivers with viewsheds, and special places. These areas are distributed throughout the Forest. A13 and B5 are shown on the Wildlife Resources Map. Complete corridors for Designated Wild and Scenic Rivers are shown on the Designated Viewshed Map. Areas with a ■ are too small to be accurately mapped at this scale. DESIGNATED VIEWSHEDS

(Supplement to Alternative Q)

Designated Viewsheds displayed on this map are recognized as areas visible from selected viewer positions across the Forest. Specific visual quality objectives are prescribed from each selected viewer position; see Forest-wide Visual Resource Management Standards and Guidelines. The prescribed visual quality objectives apply regardless of the Management Area designations on the Alternative Q map. Red numbered areas are displayed with their corresponding selected viewer positions.

The upper reaches of Eagle Creek (within the Salmon–Huckleberry Wilderness) and the North Fork of the North Fork of the Breitenbush River (within the Mt. Jefferson Wilderness and the Olallie Scenic Area) are Eligible Wild and Scenic Rivers not displayed on this map.

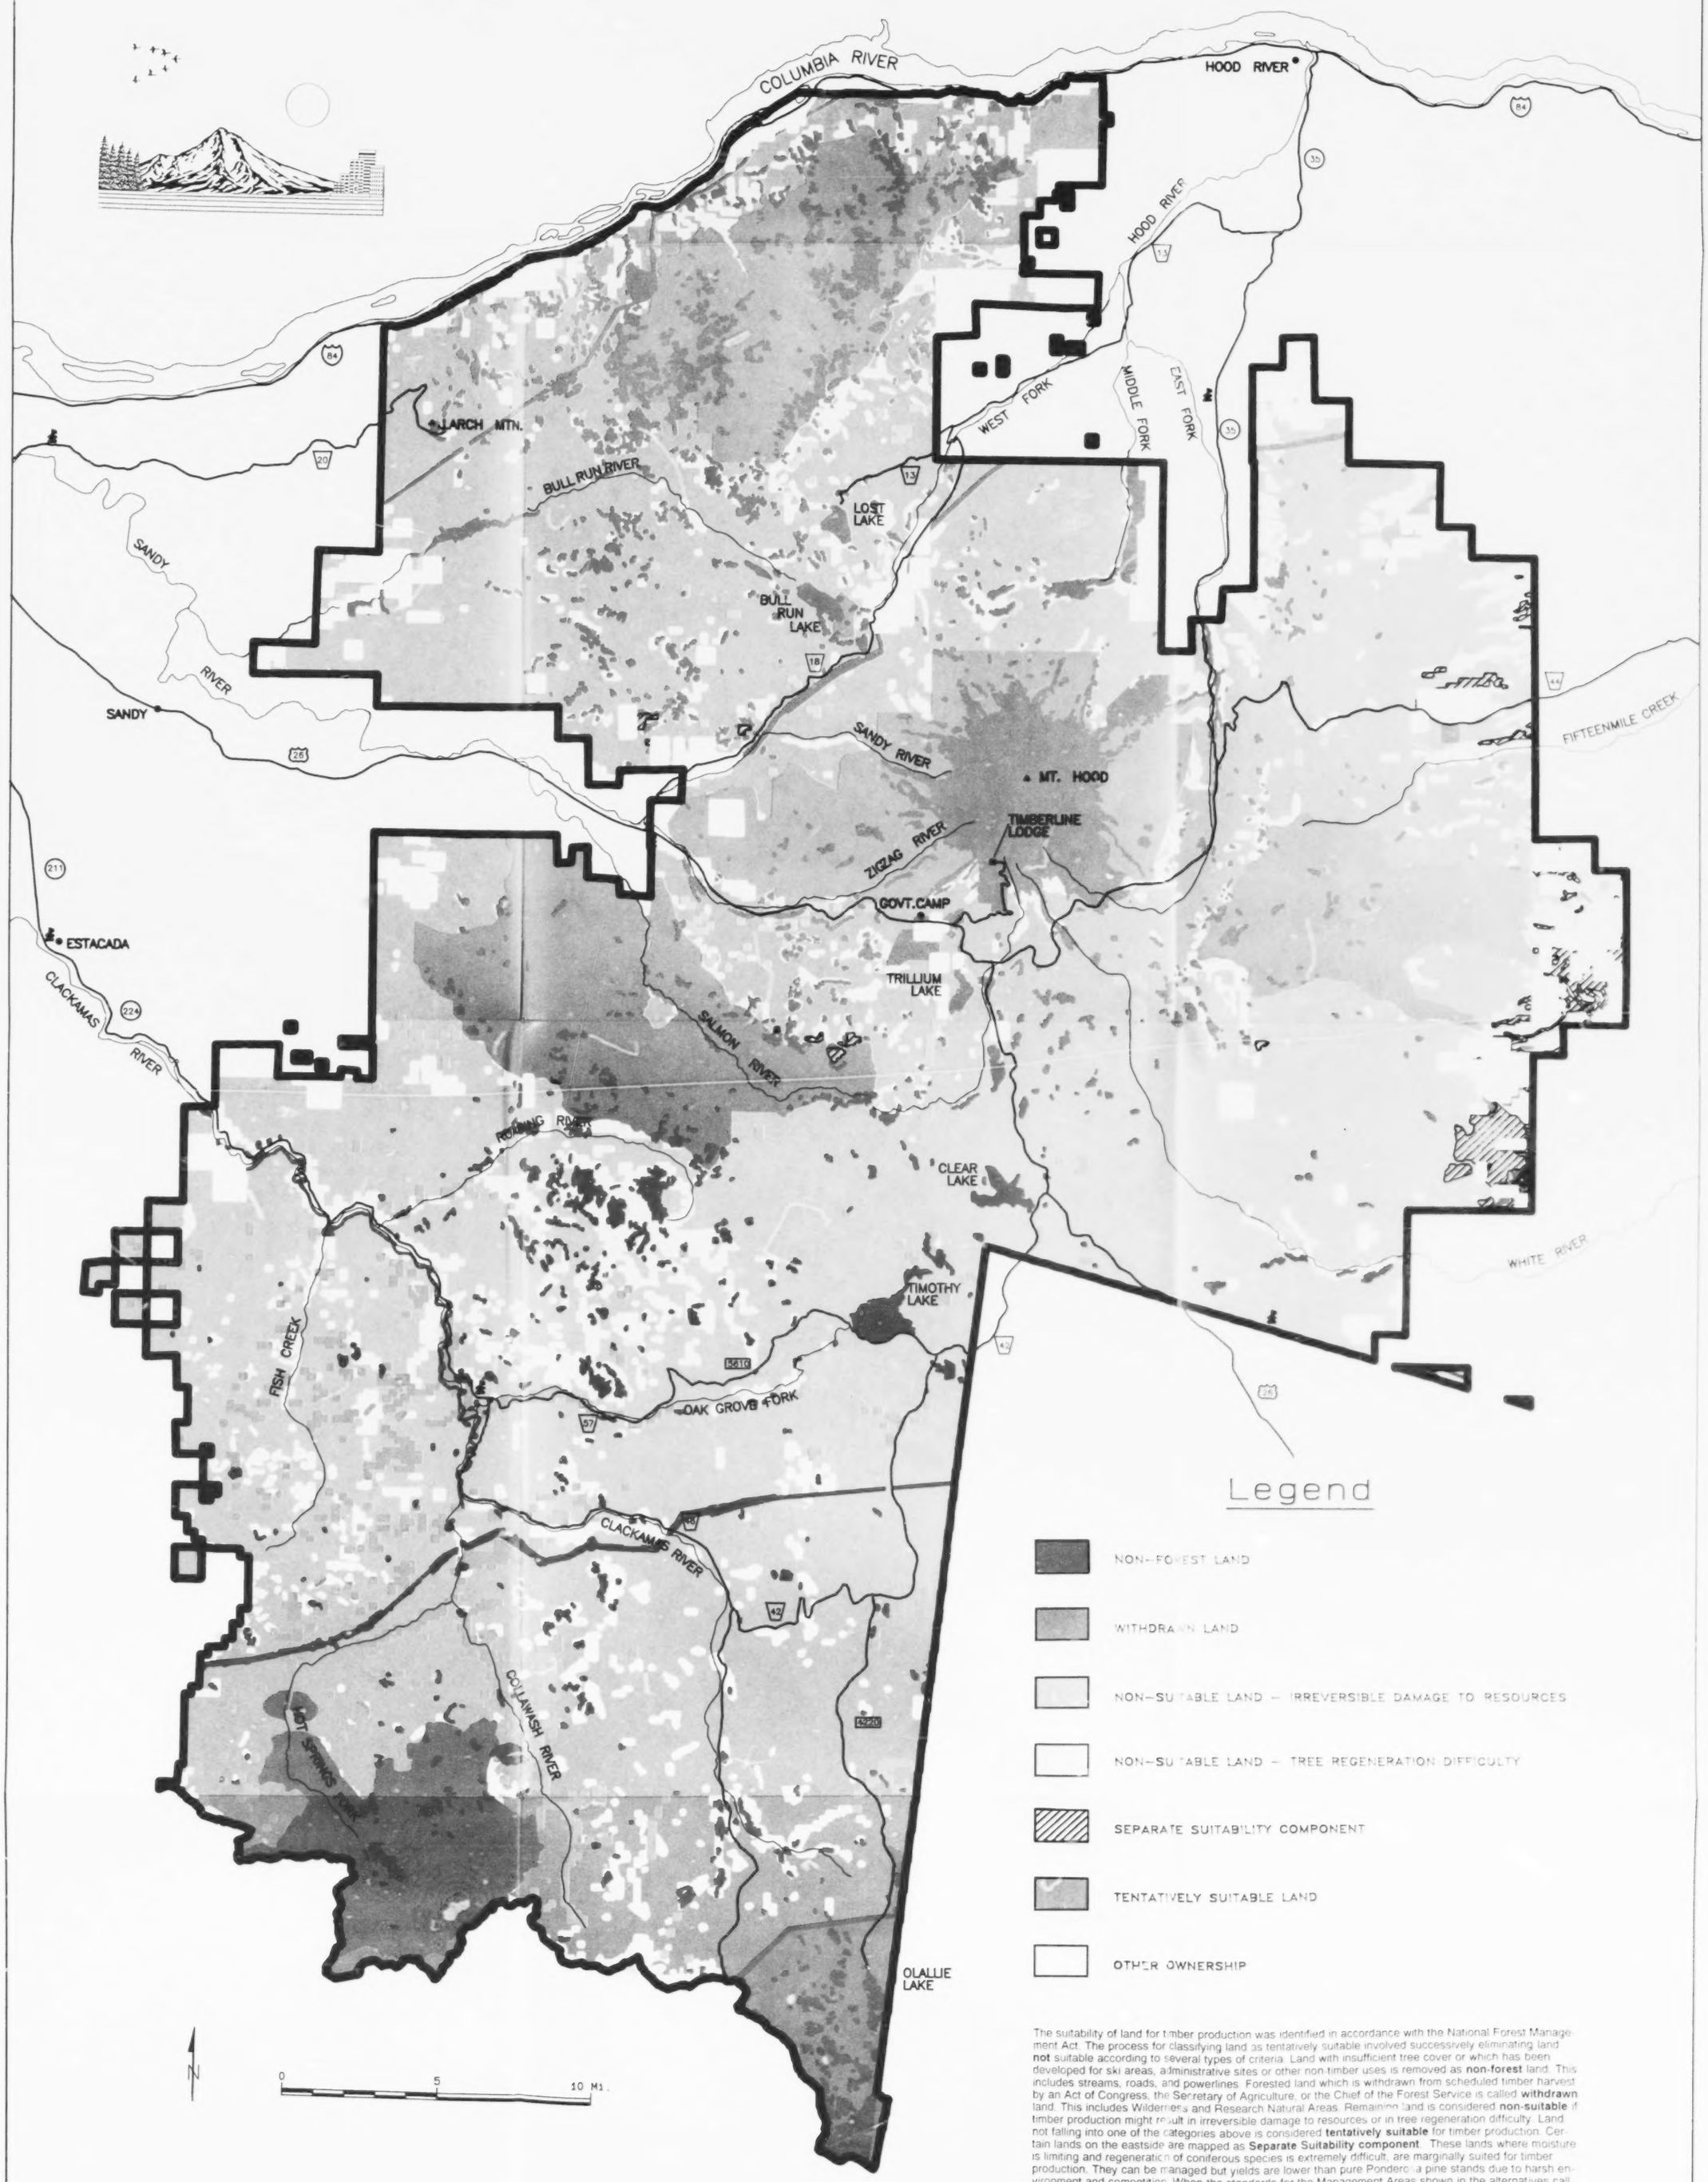
TIMBER SUITABILITY



Legend

- NON-FOREST LAND
- WITHDRAWN LAND
- NON-SUITABLE LAND – IRREVERSIBLE DAMAGE TO RESOURCES
- NON-SUITABLE LAND – TREE REGENERATION DIFFICULTY
- SEPARATE SUITABILITY COMPONENT
- TENTATIVELY SUITABLE LAND
- OTHER OWNERSHIP

The suitability of land for timber production was identified in accordance with the National Forest Management Act. The process for classifying land as tentatively suitable involved successively eliminating land **not** suitable according to several types of criteria. Land with insufficient tree cover or which has been developed for ski areas, administrative sites or other non-timber uses is removed as **non-forest** land. This includes streams, roads, and powerlines. Forested land which is withdrawn from scheduled timber harvest by an Act of Congress, the Secretary of Agriculture, or the Chief of the Forest Service is called **withdrawn** land. This includes Wilderness and Research Natural Areas. Remaining land is considered **non-suitable** if timber production might result in irreversible damage to resources or in tree regeneration difficulty. Land not falling into one of the categories above is considered **tentatively suitable** for timber production. Certain lands on the eastside are mapped as **Separate Suitability component**. These lands where moisture is limiting and regeneration of coniferous species is extremely difficult, are marginally suited for timber production. They can be managed but yields are lower than pure Ponderosa pine stands due to harsh environment and competition. When the standards for the Management Areas shown in the alternatives call for timber management, it is the tentatively suitable land within those areas which would become suitable for timber production. Land within the Forest boundary which is held privately or by other agencies, **other ownership**, is excluded from the suitability analysis and from Forest Service management. The above graphic representation of land suitability is subject to field verification.
